SUMMARY

Software Engineer with production experience building backend REST APIs and services (Java, Spring Boot, Spring MVC) that integrate with Python-based OCR and LLM services, React.js front-ends, and PostgreSQL/MySQL-backed systems. Comfortable working across the full stack – from schema design through Docker-based deployment – and troubleshooting live production issues in an Agile/Scrum team.

EDUCATION

Suryodaya College of Engineering and Technology B.Tech in Computer Science & Engineering — CGPA: 7.10	2021 - 2025
Vidhyaniketan High School and Junior College H.S.C (Computer Science) — 91.83%	2019 - 2021

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, SQL

Backend & Frameworks: Spring Boot, Spring MVC, Spring Security, REST APIs, JDBC, Hibernate, Microservices

AI & Automation: Python-based OCR/LLM Service Integration, Data Validation & QC, Fuzzy String Matching, Text Normalization

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Databases: PostgreSQL, MySQL, Oracle – Schema Design

DevOps & Tools: Docker, Git, GitHub, Maven, Postman, Flyway, CI/CD, Agile/Scrum

Core Concepts: OOP, DBMS, Data Structures & Algorithms, REST/MVC Architecture

EXPERIENCE

Vintyaa Technologies Software Engineer	Apr 2026 - Present
- Own end-to-end backend development of the company's Stock & Sales Report (SSS) automation pipeline, connecting a Java/Spring Boot backend to Python-based OCR and LLM services for 5+ pharmaceutical distributor clients, processing ~5,500 files/month for its largest client. - Build RESTful APIs and backend services in Java with Spring Boot/Spring MVC, and develop the React.js front-end interfaces integrated with these APIs, covering both layers of the pipeline. - Design MySQL schemas, write SQL queries and stored procedures, and implement CRUD operations, authentication, and validation across the stack in an Agile/Scrum team. - Troubleshoot and resolve production pipeline issues – recovering stripped file extensions in a corrupted ZIP archive and fixing a column-shift bug in the front-end QC tool – while keeping a living project document updated for team continuity.	
Bliinc Innovations Research & Development Intern — Nagpur	Dec 2024 - Apr 2025
- Developed a real-time face tracking system using computer vision techniques, cutting manual camera adjustments by 66% and improving live-stream automation efficiency. - Participated in Agile sprints (feature development, testing, code reviews) and collaborated with cross-functional hardware/software teams during daily stand-ups.	

PROJECTS

FoodFinder — Java, Spring Boot, PostgreSQL, Docker	2026
- Built a full-stack restaurant discovery platform with Spring Boot REST APIs and a PostgreSQL backend, serving 4,618+ restaurant listings via paginated search by cuisine, dish, and location. - Designed a custom ranking algorithm (rating, affordability, proximity) plus Haversine-based geolocation, and containerized the service with Docker for deployment.	
Product Name Automation — Python, Pandas, OpenPyXL, OCR, LLM	2026
- Developed an OCR-based pharmaceutical product classification and mapping pipeline that cleans noisy product names and maps records to a master catalog using brand, variant, dosage form, strength, and pack-size matching. - Implemented fuzzy matching, OCR-aware normalization, and LLM-assisted reranking with a local-first / LLM-fallback design, achieving a verified 2.72× processing speedup.	
Personal Portfolio Platform — Java, Spring Boot, Spring Security, PostgreSQL, Docker, Flyway	2026
- Built a database-driven portfolio site with a layered Spring Boot architecture exposing REST APIs for projects, skills, and experience, backed by PostgreSQL with 9 versioned Flyway migrations. - Secured an admin panel with Spring Security (HTTP Basic auth, CSRF protection) and containerized the app with Docker for deployment.	

ACHIEVEMENTS & ACTIVITIES

Gold Medalist – College-Level Hackathon.

HackerRank Silver Badge in Java (DSA).

Completed Barclays Training & Personality Development Program.

CERTIFICATIONS

• AWS Certified Data Engineer – Udemy • DSA (JS) – Udemy • Java Development – Udemy • Full Stack Developer Bootcamp – GeeksforGeeks (GfG) • Reinforcement Learning – NPTEL
